

AROUND THE

CEMENT PLANT

We are glad to see **Harry Barrett** on his feet again after a spell in Wall-send Hospital.

Jack Dillon caught a couple of fish in the Creek and didn't mention it to us. Good reason why—total weight was 6 ozs.

We notice that **Bill Thomas**, who is hard of hearing, has the edge on us when spoken to in the vicinity of the noisy mills. He doesn't miss a syllable.

By the time we are in print **Jimmy Scarfe** will have settled in at Broken Hill. All the best, Jim.

Having visited Tweed Heads during his holidays, **Walter Atkins** is quite enthusiastic about the district and claims he had a "wow" of a time there.

P.I.D.

At present in South Australia on company business Supt. **Peter Mead** flew over—he's getting air-minded these days.

From the amount of work that **Las Banathy** is doing at home painting his house, we reckon he's glad to come to work to relax.

Phil Happ has completed his training at the Acid Plant and has moved on to the Super Shed.

MAIN OFFICE

Quite a number are on holidays at the moment, including **Owen Lewis**, **Doug. Rich**, **Clarrie Roberts**, **Albert Wright**, **Mrs. Lois Muir**, and **Pat Donohoe**. We will probably hear of their experiences and adventures later.

Brian Williams has been moving around amongst the Newcastle golf clubs. He's due to hit the headlines shortly.

Our star air man **F./Lt. Brian Gesell**, has commenced solo-flying. We won't be at all surprised if he buzzes us some week-end.

Any Monday now, we can expect fresh fish to be on at the canteen. With his new fishing gear **Mr. Edge** should be able to supplement the menu.

Quite enthusiastic over added responsibilities, **Mrs. Joan Harbutt** is being kept busy with 10 puppies that demand a lot of attention.

Already owning three breeds of poultry **Lester Miller** is looking around for some Light Sussex. He certainly believes in variety.

LABORATORY

How does the Recorded Club manage to maintain balanced programmes? Last week one of their members, **Don Young**, enthusiastically listened to **Benny Goodman** for four hours.

On holidays **Fred Hughes** is gone on a car tour. We hope he'll strike good weather.

The move into the Works Laboratory has now taken place. Waxing enthusiastic, **Jack Simpson** used the words "spic and span, better lighting and more elbow room."

Harry Pett has been on the job, giving a hand relieving **Peter Kerr** on holidays.

TRAFFIC AND YARD

George Barnier has transferred to the Yard department. It seems that horticulture will be his new interest.

We are glad that **Mrs. Rutherford** is showing continued progress and will be home from hospital shortly.

Have noticed **Mrs. Wal Green** attending hobby classes at Cardiff Evening College. We expect to see Wal sporting a new plastic belt any day now.
