

Around the Departments—Cont.

we hope to see him about for quite a while yet before he ultimately takes up residence at 95 Collins Street.

Although our office-staff are used to keeping accounts, many worried brows indicated the strain of adjusting "Income Tax Returns." Our married ladies, **Mrs. Appleby**, **Mrs. Harbutt** and **Mrs. Muir**—seemed to be the most concerned.

On Saturday, 14th July, **Pat Donohoe** and **Esko Wuolanne** were guests of honour at an engagement party in the Welfare Hall. Quite an enjoyable evening was chaired by **Mr. Len Horn**.

Friday, the thirteenth, was the beginning of a good weekend for **Brian Williams**. He won three competitions on the Waratah Golf Links.

ELECTRICAL by "Cy"

Our congratulations to **George Brailey** on his achievement in producing what we call the Round-a-bout Conveyor which we believe is doing and serving the purpose it was set out to do—extracting the cement from the silos. So we say again—"Leave it to George."

We welcome **Ray McBlane** who has come to us from the Drawing Office to further his apprenticeship as Fitter and Turner; whilst **Teddy O'Toole** returned to the Fitting Shop and **George Paddock** Electrical apprentice to the Drawing Office.

Les Mizen has been off on the sick list with influenza. We trust by the time of this issue he will be fully recovered.

Sel Lewis we are sad to say has been off with a sore toe proving it's a thing not to be taken too lightly, turned out to be an infected foot and we trust that he too by now will be O.K. again.

ACID by "Dee See"

The T.L.'s are again operating—this time we mean **Operating**. It is difficult to say who is the more pleased, **Mr. (Optimistic) Harvey** of Simon Carves, or the boys who bid "Au revoir" to **Shay Mann** and returned from the Pool to take part in the operation.

The T.L. crew are **Doug. Eckford**, **Bob Chedzey**, **Bert Masters**, **Jack Raw**, **Perce Brown**, **George Chalmers**, **Ron Wood** and **Mick Wolter**.

Supt. **John Reynolds** along with Asst. Works Engineer **Andy Thomson** inspect No. 2 Acid Plant in a novel way.

The following "gift card" was anonymously placed on the plant instrument panel.

"To Sulphide Corporation—T.L. Roasters with care.

Good things come to him who will but wait."

Longfellow.

Congratulations to former acid personality **Ken Sainsbury**, on his appointment as Acting Superintendent Traffic and Yard—the job could not be in better hands.

Bernie "James" Berthold has forsaken the "hempen square" for the tennis court having received favourable press comment as a member of an undefeated local team.

Kevin Roworth is in the "bomb" business again—he was noticed last week towing the latest addition through the town—no doubt checking the performance of the prime mover.

Peter Smedley and **Wally Brooks** spent a recent rostered-off period in search of snow. The mission was successful apart from a minor caravan repair.

The Acid Plant Ear-bashing Championship was won by **Andy Fotheringham**. If our report is correct—a very meritorious achievement against strong opposition.

Congratulations to **Dave Crawford** on winning the yearly prize for Management Stage 3A—Production. The Technical College held its Prize Night at the City Hall on 3rd July.
